Tecno Fidta 2018: more advances and news

The food processing industry will gather on September 18-21 in the greatest exhibition of its kind in the country. More than 160 firms will show the latest technologies and seek to generate new contacts and customers.

Tecno Fidta, the 14th Food Technology, Additives and Ingredients Trade Fair, is on the final stage of preparations to open its doors at the end of September in Costa Salguero Center. The organizers expect to receive, during four days, more than 10,000 visitors of the sector.

The companies, on their part, are getting ready to take the greatest advantages of their participation and advance their plans.

"It is an excellent opportunity to show all our range of products", says Andrés Gazzano, Sales Manager and Director of **ARISTÓBULO GÓMEZ RUPÉREZ**. The firm will present the Glassco brand glass and plastic material line, to which it will soon add equipment. Besides, it will take Pyrex bottles for 9, 12, 20 and 46 liters solutions; the Falcon and Costar disposable plastic materials, its Borosilicate Viewers and 3 to 300 mm diameter glass tubes.

For **DORBEN ACCESORIOS INDUSTRIALES** this will be the second participation in Tecno Fidta in a row, it is an exhibition that "helps us to promote and strengthen new business relationships, create loyalty among customers and reach new segments of the market", ensures María Elisa Andrés, Managing Partner of the company and she adds: "it is an unique opportunity to position in the food sector." The executive advances that they will show a new inflatable dock shelter for refrigerated loading and unloading sectors, where it is necessary to keep a constant temperature. They will also bring a fast self-channeling stainless steel door and accessories for BRC FOODS and IFS certifications.

From **ADEPTA** –the association that gathers French companies specialized in agriculture and food processing- they tell us that this is their first time in Tecno Fidta. In the booth, Steriflow will present a range of waterfall autoclaves, whose flexibility allows to sterilize or pasteurize the great majority of food in all kind of packages, being rigid or flexible.

TAMI, meanwhile, will show ceramic membranes in the micro-filtration, ultra-filtration, and fine ultra-filtration range for molecule separation in liquids. "TAMI membranes are used in different industrial sectors such as food and beverages, biopharmaceutical and environmental solutions", explains Patricia Villavicencio from Adepta.

Expectations and future plans

Tecno Fidta is also a place for the meeting of professionals, who discuss, exchange information and feel the market situation, both currently and in the medium and long term.

"We have widely exceeded our participation expectations within the food sector. The sector is very dynamic, demands quick and effective answers when it comes to request and receive after sales service. For this reason, we are carrying out an investment project in a new warehouse that enables us to widen the production capacity for special solutions and, especially doubling and modernizing our spare part area", says María Elisa Andrés regarding Dorben Accesorios Industriales' plans.

Gazzano, states that for Aristóbulo Gómez Rupérez "the perspectives up to May were ones and, after May, they have suffered a radical change. Likewise, we trust that things will return to normal soon, we believe we are on the right path, and if we are able to keep the path, Argentina will have a real growth in the future. We have got ISO 9001 certification five years ago, and this helped us a lot, since that gave us order and the instruments that allow us to improve efficiency in our work."

These and many more news will be seen in **Tecno Fidta** on **September 18-21, 2018, in Costa Salguero Center** of Buenos Aires, Argentina.

The exhibition is only for businessmen and professionals of the sector. With an invitation: free of charge. People under 18 years will not be admitted, even if attending with an adult. Baby strollers are not allowed.
